

A2

(b) a relatively hard, dense protective top layer
[overlying] which is adhered to the tops of the blocks of
said insulated [roofboard] roof board member.

Please cancel claims 6 and 7 without bias or prejudice.

Please add the following claims:

A3

6. A composite structure according to claim 1 in which
said solid insulating material is a lightweight material.

7. A composite structure according to claim 1 in which
said solid insulating material is a lightweight cellular
material.

REMARKS

The drawing has been amended in several respects.

First, reference numeral 10 has been added in Fig. 1 in
accordance with page 13, line 11 of the specification.

Reference number 14c has been added in Figs. 1 and 3, in
accordance with page 7, line 15 of the specification.

Fig. 2 has been amended to show the peripheral edges of
the roofboard structure as specified in claims 2, 3 and 7.
The preferred shape is rectangular as pointed out on page 6,
lines 12-14 and on page 10, lines 29-33. The edges have been
assigned reference numerals 12a, 12b, 12c and 12d. There
are two pairs of peripheral edges, i.e., 12a, 12c and 12b,
12d.

No new matter is involved in these changes.

These changes will be made in the formal drawing upon
approval by the Examiner and indication of allowable subject
matter.

The specification has been amended as follows:

At page 5, line 27, the reference numeral "10" has been
added to denote the roofboard in accordance with page 13, line
10.
